

Fast Foam is a two part expanding foam used as a water block or to seal two piece sumps.

FEATURES & BENEFITS

- Instant Water Block & Injectable Gasket
- Expands to 20 times its original volume
- 5% elasticity after expansion
- Rated to stop 25 gallons per minute
- 50ml cartridge and compact delivery system make it easy to work in tight spaces
- Cartridge comes with a steel syringe tip to get the material where you need it

Fast Foam is designed to expand instantly so it can be used to stop water with a high flow rate that would wash away conventional hydro active foams before they could expand.

The steel syringe tip allows you to inject fast foam between the flanges of two piece sumps.

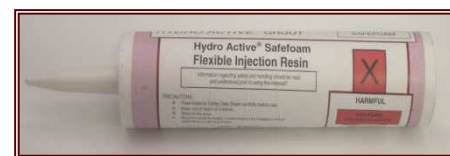

Part Number	Description	List Price
ACB047	Fast-Foam, instant water block & injectable gasket. 50ml cartridge w/ static mixer	\$ 27
ACB047A	Case of 20 Fast-Foam, instant water block & injectable gasket 50ml cartridges w/ static mixer	\$ 494
ACB048	Manual dispensing gun for 50ml Fast-foam cartridges	\$ 77

Hydro Active Safe Foam is a low viscosity inject able foam used to stop water intrusion long enough to install permanent Blueline repair fittings.

FEATURES & BENEFITS

- Hydro Active Safe Foam is a low viscosity polyurethane injectable resin designed for temporarily repairing leaks in sumps
- Safe Foam is a hydrophilic MDI based resin that is both environmentally and user friendly
- Safe Foam expands up to twenty times its original volume and cures to a flexible, closed-cell foam that is extremely tough
- This product will stop most water flow enough to give the contractor time to complete a permanent Blueline repair

Part Number	Description	List Price
ACB009	Hydro Active Safe Foam – 10 oz. Tube (Case of 12)	\$ 909
ACB009A	Hydro Active Safe Foam – 10 oz. Tube	\$ 76
ACB008	High Pressure Pneumatic Dispensing Gun (Works with 10 oz. Tubes)	\$ 91
