

Hydro Active Safe Foam

Hydro Active Safe Foam is a low viscosity injectable foam used to stop water intrusion long enough to install permanent Blueline repair fittings.

FEATURES & BENEFITS

- Hydro Active Safe Foam is a low viscosity polyurethane injectable resin designed for temporarily repairing leaks in sumps
- Safe Foam is a hydrophilic MDI based resin that is both environmentally and user friendly
- Safe Foam expands up to twenty times its original volume and cures to a flexible, closed-cell foam that is extremely tough
- This product will stop most water flow enough to give the contractor time to complete a permanent Blueline repair
