

# The K2 Series Penetration Fittings

*Compatible With Continuously Monitored Sumps  
Or Single Wall Sumps*

## FEATURES & BENEFITS

### Easy Installation

- Unique internally bolted design requires only one hole for installation
- Eliminates the need for separate bolt holes
- Available for all popular piping types and sizes

### Innovative Design / Easy Maintenance

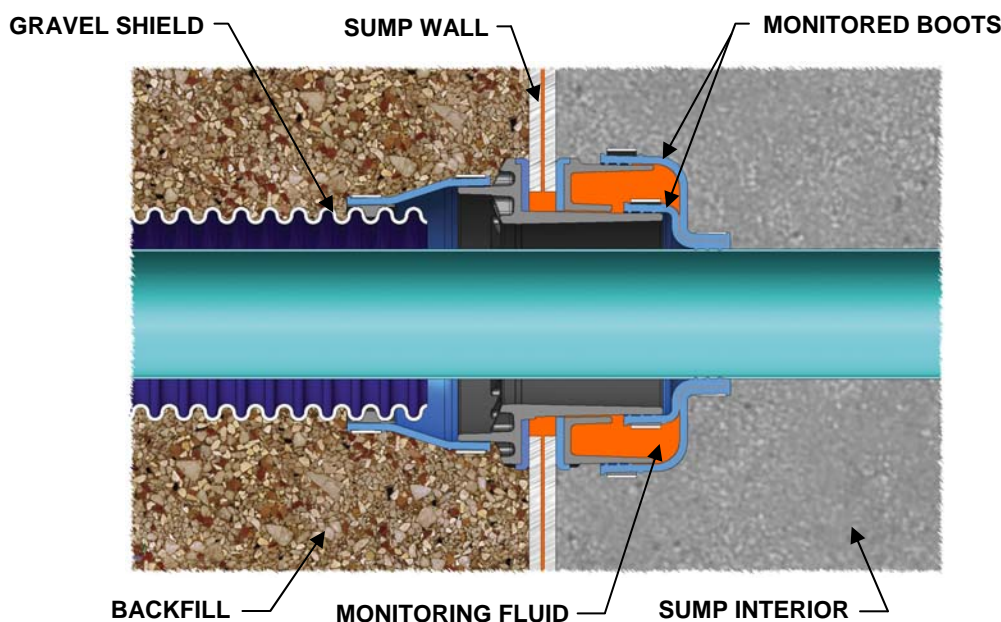

- Both monitored boots are fully accessible from inside the sump allowing easy replacement
- Fully communicates with hydrostatic or vacuum monitored sumps
- Smaller "Footprint" and lower profile to save room in tight spaces
- Allows pipe to be installed at angles up to 12°

### Durability

- No monitored flex boots are exposed to the backfill
- UL Listed Pellethane Reducer Boots for better hydrocarbon resistance
- Improved material utilizing the latest in plastics technology making the boots resistant to all environmental or chemical attacks

ALL PELLETHANE REDUCERS UL LISTED  
FILE NUMBER MH28727
