

PER Series Reducers / Test Reducers

The PER Series Pellethane Reducers and Test Reducers are used to step down from secondary to primary pipe sizes. The Test Reducers are available with or without an air valve and can be used to test the interstitial space between the secondary and primary piping for leaks. All fittings come with band clamps and with or without air test valves.

FEATURES & BENEFITS

- The PER SERIES Reducers and Test Reducers are used to terminate between primary and secondary pipes.
- Installs quickly
- Available offset, when primary pipe isn't concentric with secondary pipe
- Made from fuel resistant pellethane material
- Available with an air test valve
- UL Listed
