

Polyfusion

Structural Plastics Adhesive

Polyfusion is a unique adhesive bonder for use in UST applications and is especially useful in bonding or repairing Polyethylene / Polypropylene / FRP components used in secondary containment systems.

FEATURES & BENEFITS

- **Polyfusion** is a structural adhesive used to bond polyethylene to polyethylene or to bond polyethylene to fiberglass.

Polyfusion Sump Repair Kits

The Polyfusion Sump Repair Kit is the perfect repair kit for split or cracked Poly components such as spill containers, dispenser, transition and tank sumps.

The kit uses the Polyfusion adhesive and a strip of glass tape to effectively and permanently seal up to ¼" (3mm) wide splits and cracks.

Part Number	Description
ACB040	Polyfusion – 50 ml Tube (Includes 2 Static Mixers) Used with gun ACB041 - Polyfusion Manual Dispensing Gun (50 ml Tubes)
ACB042	Polyfusion – 50 ml Tube (Case of 10) (Includes 20 Static Mixers) Used with gun ACB041 - Polyfusion Manual Dispensing Gun (50 ml Tubes)
ACB040A	Polyfusion – 250 ml Tube (Includes 3 Static Mixers) Used with gun ACB041A - Polyfusion Manual Dispensing Gun (250 ml Tubes)
ACB042A	Polyfusion – 250 ml Tube (Case of 6) (Includes 20 Static Mixers) Used with gun ACB041A - Polyfusion Manual Dispensing Gun (250 ml Tubes)
ACB043	Polyfusion Repair Kit – (1) Polyfusion 50 ml Tube, (2) Mixers, Glass Cloth, Tape & Squeegee
ACB044	Polyfusion Repair Kits (Case of 10)
ACB041	Polyfusion Manual Dispensing Gun (Works with 50ml Tubes) Used with ACB040 & ACB042
ACB041A	Polyfusion Manual Dispensing Gun (Works with 250ml Tubes) Used with ACB040A & ACB042

Tight Space Delivery System

The manual delivery system is used to easily deliver 50ml of Polyfusion for boot to pipe connections, Poly Sump, or spill container repairs. The dispensing gun and static mixers are small enough to enable ease of use in confined spaces.
