

SB Series Split Repair Boots

The SB Series Pellethane Split Repair Boots are used inside the sump to encapsulate or replace leaking penetration fittings. Split Inserts (SI Series) are ordered separately and are used in the boots in order to bring the boot to specific pipe dimensions.

FEATURES & BENEFITS

- Make all repairs from inside the sump. No need to break concrete, excavate back fill or break pipe or conduit.
- Repair fittings around existing or new pipe and works on flat or curved sumps
- Test immediately after the repair is done
- Extensive range of boot and insert sizes to accommodate all pipe OD's and fitting styles
- Durable UL Listed Pellethane Construction
- Repair boots are filled with sealant through a fill port to stop leaks and stabilize the repair
