

UV Resistant - PENETRATION FITTINGS - ABOVE GROUND APPLICATIONS

The UV-KFD Kwik Fit Series are double sided new construction fittings designed for above ground installations. The Kwik Fit Series offers all the security of a rigid fitting with a mechanically secured rigid housing and all the benefits of a flexible UV and environmentally resistant reducer boot .

FEATURES & BENEFITS

Durability

- Rigid housing construction
- Incorporates Improved Anti Microbial and established UV resistant additives
- UL Listed flexible reducers
- Reflective color reduces UV absorption
- For maximum durability the fittings can be filled with our unique polysulphide filler "PetrolSeal" (see Sealants & Bonders Section)

Simple Installation

- Simplified installation, drill one hole only
- Simple locating pins align and hold fitting for one person installation and can accommodate different wall thicknesses just by using longer bolts
- Unique internal bolting design gives maximum torque and removes the need for additional bolt holes through the sump/tank wall

Works on any Tank/ Chamber

- Simplified fitting sizes and choices
- The UL Listed Pellethane® reducers can be purchased separately from the housings allowing easy split replacements without disconnecting pipe

Angled Entries

- Provides excellent flex features for angled entries, sideways AND lateral movement up to 12°
- Provides maximum mechanical flange torque for total sealing pressure

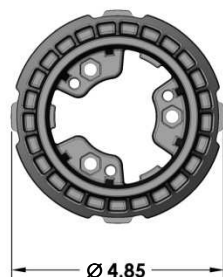

ALL PELLETHANE REDUCERS UL LISTED
